Kmobile, POS (available) at the table!

An extended application for Krypton POS that is android based and ensembles to run for Clover users.

Operate POS right beside the customer at the table, this one of a kind app helps restaurant save time by eliminating servers going back and forth from customer's table to the counter to input orders and do settlements. It has straight to the point interface which makes navigation easy as 1-2-3.

Able to do the following:

1. Orders at the table for convenience
2. Payment at the table for secure transactions

System Flow:

Important guidelines to follow:

1. Install Krypton POS on any computer, click the link and follow the procedure.
   http://www.posbang.com/accounts/downloadresto
